### Learning Objectives

The course is designed to help pathologists:

Analyse and interpret appropriately architectural and morphological features enabling a definitive diagnosis of prostate cancer in specimens with limited amount of suspicious glands and minimal atypia.

Review pathological features of HPV and non-HPV related adenocarcinoma of the cervix and discuss the tubo-ovarian serous carcinogenesis.

Update knowledge of grading, staging and reporting Genitourinary and Gynecologic cancer.

Describe and apply cyto-histological criteria in order to compare different entities which may pose relevant difficulties in a day-to-day practice in Genitourinary and Gynecologic pathology.

Evaluate how accurate diagnosis of emerging entities of Genitourinary and Gynecologic pathology may influence treatment selection.

### GENERAL INFORMATION

The Foundation “MALPIGHI PATHOLOGY ACADEMY” will hold a three-day course focusing on an update on Genitourinary and Gynecologic pathology.
