Goals
The meeting will focus on advances in diagnostic pathology with emphasis on translational discoveries and molecular approaches that have impacted the clinical care of patients with cancer. The program will be both practical and informative, geared towards practicing physicians and translational scientists. Lectures with emphasis on state-of-the-art laboratory techniques that help inform targeted therapies, including next-generation sequencing, immunohistochemistry, and fluorescence in situ hybridization.

Target Audience
The program should be of interest to pathologists, pathologists-in-training, molecular biologists, and medical and surgical oncologists and surgeons.
