Learning Objectives

The course is designed to help pathologists:

Update current knowledge of pathology of special subtype tumors of the Breast with particular attention to Immunohistochemistry in differential diagnosis.

Review pathological features of Columnar cell lesions, Papillary and Fibroepithelial tumors of the Breast.

Describe criteria for diagnosis in Core Needle Biopsy in order to compare different entities which may pose relevant difficulties in today's practice.

Utilize practical slide seminar sessions to discuss and compare morphological criteria applied to Diagnostic Breast Pathology.
