The Foundation "Malpighi Pathology Academy" has exclusively scientific and cultural aims and intends to gather together those who promote and commit themselves to expand and coordinate the study of, and the scientific and cultural progress in, the field of Pathological Anatomy and Histology and to disseminate its application.

The Foundation will pursue the objectives that follow:

- ❖ to promote and disseminate the study and research in the field of Pathological Anatomy and Histology
- ❖ to develop and promote a sustained activity of professional education and update of those attending, with educational programs related to Pathological Anatomy and Oncologic Pathology
- ❖ to build programs and contexts in which the theme of Pathological Anatomy and Histology encourages an organic response, in synergy and synergy with other initiatives and contexts
- ❖ to organize scientific meetings, as well as educational programs related to Pathological Anatomy and Histology
- ❖ to promote study initiatives and scientific research with specific goals, also in collaborations with other scientific societies or entities

Monday, September 16, 2019

- 08:00 Registration
 09:30 The spectrum of low grade ductal neoplasia
L. Collins, MD
 10:30 The spectrum of triple negative breast neoplasia
S. Schnitt, MD
 11:30 Coffee break
 12:00 Papillary lesions of the breast
L. Collins, MD
 13:00 Light lunch
 14:00 Lobular carcinoma in situ and problematic in situ lesions
S. Schnitt, MD
 15:00 Inflammatory and reactive lesions
L. Collins, MD
 16:00 Coffee break
 16:30 Contemporary approach to lumpectomy margin evaluation
S. Schnitt, MD
 17:30 Interesting case slide seminar
L. Collins, MD
 18:30 Adjourn

Tuesday, September 17, 2019

- 09:00 Spindle cell and vascular lesions of the breast
S. Schnitt, MD
 10:00 ER/PR/HER2 testing: an update
L. Collins, MD
 11:00 Coffee break
 11:30 Molecular testing in the management of patients with breast cancer
S. Schnitt, MD
 12:30 Mucinous lesions of the breast
L. Collins, MD
 13:30 Light lunch
 14:30 The challenge of evaluating post-neoadjuvant systemic therapy breast specimens
S. Schnitt, MD
 15:30 Current issues in breast core needle biopsies
L. Collins, MD
 16:30 Coffee break
 17:00 Interesting case slide seminar
S. Schnitt, MD
 18:00 Concluding remarks

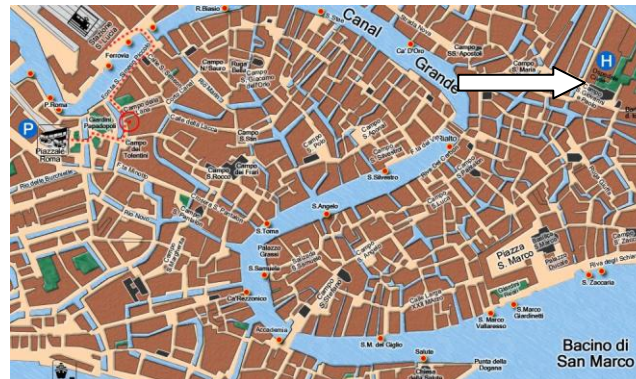

**Auditorium San Domenico, Scuola Grande di San Marco
 Campo Santi Giovanni e Paolo
 Venice - Italy**

Learning Objectives:

This two-day extensive review of breast pathology will enable pathologists to:

- ✓ Become more proficient in diagnosis and clinical significance of inflammatory, reactive, in situ and malignant lesions of the breast.
- ✓ Update current knowledge of triple negative breast neoplasia
- ✓ Describe criteria for papillary and mucinous lesions of the breast
- ✓ Review pathological features of spindle cell and vascular lesions of the breast.
- ✓ Apply immunostaining and molecular testing for the management of patients with breast tumor.
