The Foundation "Malpighi Pathology Academy" has exclusively scientific and cultural aims and intends to gather together those who promote and commit themselves to expand and coordinate the study of, and the scientific and cultural progress in, the field of Pathological Anatomy and Histology and to disseminate its application.

The Foundation will pursue the objectives that follow:

- ❖ to promote and disseminate the study and research in the field of Pathological Anatomy and Histology
- ❖ to develop and promote a sustained activity of professional education and update of those attending, with educational programs related to Pathological Anatomy and Oncologic Pathology
- ❖ to build programs and contexts in which the theme of Pathological Anatomy and Histology encourages an organic response, in syntony and synergy with other initiatives and contexts
- ❖ to organize scientific meetings, as well as educational programs related to Pathological Anatomy and Histology
- ❖ to promote study initiatives and scientific research with specific goals, also in collaborations with other scientific societies or entities

May 25 – 26, 2020

18:30 Adjourn

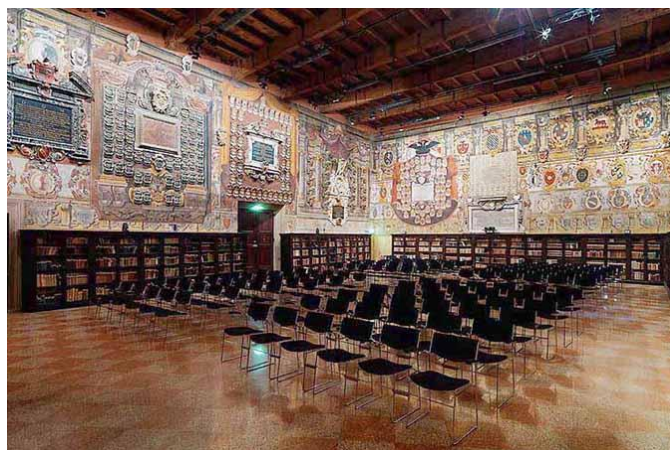

Tuesday, May 26, 2020

- 09:00 Appendiceal lesions **M. Pezhouh, MD**
10:00 Medication Injury in the GI Tract
D. Lam-Himlin, MD
11:00 Coffee Break
11:30 Gastric Polyps and Gastritis
E. Montgomery, MD
12:30 Chronic Hepatitis – Staying out of Trouble
M. Pittman, MD
13:30 Light Lunch
14:30 Mimickers in GI pathology
L. Voltaggio, MD
15:30 A Potpourri of Mesenchymal Lesions
E. Montgomery, MD
16:30 Coffee Break
17:00 A Guide to Inflammatory Bowel Disease Mimics
C. Arnold, MD
18:00 Concluding remarks
M. Pezhouh, MD & E. Montgomery, MD

Learning Objectives:

This two-day extensive review of Gastrointestinal pathology will enable pathologists to:

- ❖ Become more proficient in diagnosis and clinical significance of inflammatory, reactive, and malignant lesions of GI tract.
- ❖ Update current knowledge of Celiac Disease.
- ❖ Describe criteria for diagnosis in Barrett's Esophagus
- ❖ Review pathological features of Chronic Hepatitis.
- ❖ Improve criteria for interpretation of mediocr-related injury and other inflammatory conditions of GI tract.

Stabat Mater Lecture Hall Archiginnasio Public Library

Archiginnasio is one of the most significant buildings in the city of Bologna: located in the heart of the historic center, it was the site of the ancient University and is now the seat of the Archiginnasio Public Library.

As evidence of the long university history of the building, the largest mural heraldic complex in the world has remained, currently composed of about 6000 student crests and inscriptions in honor of the professors.

Tourist Information:

www.bolognawelcome.com

Located in the heart of Italy between Florence and Venice, Bologna is home to one million inhabitants in the greater metropolitan area. Capital of the Emilia Romagna region, Bologna is a city full of history. Its well-preserved medieval city center is among the largest of its kind in Europe. Forty-two kilometers of porticoes, the red brick of its buildings and the medieval towers, give Bologna its unique character. The oldest University of the Western world, founded in 1088, is located in Bologna.

Admittance: this CME live activity is intended and designed for pathologists. The participant number will be limited and therefore early application is advised.

Accommodation: special rates are available for conference participants at Bologna Art Hotels <https://en.bolognarthotels.it/>
Please contact malpighi.pathologyacademy@gmail.com for booking information.
