

## COURSE OBJECTIVES

Upon completion of this review course, the participant should be cognizant of:

- the exfoliative and non-exfoliative (including fine needle aspirations) cytomorphic features of neoplastic and non-neoplastic lesions of the female genital tract, respiratory tract, urinary tract, body fluid cavity, cerebro-spinal fluid, lymph nodes, breast, thyroid, head and neck regions and intra-abdominal organs
- the diagnostic pitfalls associated with the various body sites discussed
- the technical aspects of fine needle aspiration cytology
- the appropriate use of ancillary techniques in diagnostic cytology
- the approach for trouble-shooting of technical problems
- the principles of quality assurance
- the new developments in the field of gynecologic Cytopathology

## COURSE DESCRIPTION

This review course will include didactic lectures on all topics, followed by microscopic sessions during which the participants will have an opportunity to review a large number of teaching sets. During the laboratory sessions, the participants will have an opportunity to discuss cytologic problems with the lecturer. Unknown cases will be used to stimulate discussion.

This course is directed at the healthcare professional who wishes an update in the field of Cytopathology.

This includes:  
Pathologists - Pathology  
Residents - Cytopathology  
Fellows - Cytotechnologists
