Identify cytologic criteria of various non-neoplastic and neoplastic entities.

Become familiar with unique management schemes in diagnostic cytopathology.

Recognize utility of ancillary techniques.

Papanicolaou Tutorial: Updated Diagnostic Cytopathology

Weill Auditorium & Archbold Commons- 2nd Fl

July 26-28, 2013 • Friday / Saturday / Sunday in NYC

Course Description

This 3-day program will consist of lectures, case presentations and discussions designed to provide pathologists with a special interest in cytopathology, pathologists-in-training and cytotechnologists with an in-depth discussion of current criteria and changing concepts in Diagnostic Cytopathology. Course materials will be provided.

Statement of Need

Diagnostic cytopathology performs a vital role in the evaluation and treatment of patients with non-neoplastic and neoplastic disease. This course is needed to advance the specialized knowledge of practicing cytopathologists and further, to encourage the exploration of current approaches and concepts in classification, differential diagnosis and management. It is designed to provide updated practical, problem-solving knowledge and information for cytopathologists, pathologists, residents and cytotechnologists.

Course Goals and Objectives

It is intended that this Weill Cornell CME activity will lead to improved patient care. At the conclusion of this activity, participants should be able to:

- Identify cytologic criteria of various non-neoplastic and neoplastic entities
- Avoid problems and pitfalls
- Recognize utility of ancillary techniques
- Become familiar with unique management schemes in gynecologic and non-gynecologic cytopathology.

Target Audience

Cytopathologists, pathologists, residents and cytotechnologists.
