

**UNIVERSITY OF WISCONSIN
MADISON HOSPITAL AND CLINICS
Cytopathology Fellowship**

Program(s):

This one year ACGME-accredited program is designed to provide comprehensive training in diagnostic cytopathology, particularly the immediate evaluation, triage and final diagnosis of Fine Needle Aspirations (FNA's). The cytology laboratory evaluates approximately 12,000 gynecologic and 3,600 non-gynecologic specimens of which 1600 are FNA's per year. The fellow will become proficient in laboratory management, diagnostics; including the performance and interpretation of FNA's and new technologies; including the ThinPrep Pap Test, HPV-DNA testing, and medical informatics. The cytopathology section utilizes video streaming for immediate evaluation and static imaging for archival purposes. This cutting edge experience provides fellows with comprehensive training in the new technologies benefiting cytopathology today. The department has a strong academic mission, and provides opportunities for cytology-based research, including molecular diagnostics. The fellow will participate in the education of residents and medical students on cytology rotations. Educational opportunities exist for rotation at the Wisconsin State Laboratory of Hygiene (including its large volume of gynecologic specimens, Cytogenetics Laboratory, and School of Cytotechnology). The fellow is expected to complete a research project for publication. Upon completion, the fellow will be prepared to direct a university or community-based practice cytopathology laboratory.

Requirements:

Applicants must be AP or AP/CP Board eligible or Board certified.

Stipends:

Commensurate with the year of postgraduate training. (e.g. based on 2010-11 stipends: \$58, 617 for PGY5 and \$60,604 for PGY6 etc)

Staff: **Suzanne Selvaggi, MD** Medical School: Albert Einstein Medical College, New York, New York (1978); Pathology Residency: New York University Medical Center, New York, New York (1983); Research Fellow in clonal culture patterns and cytogenetics of lymphomas and leukemias: New York University Medical Center, New York (1982); **Jimmie Stewart III, MD** Medical School: University of Arkansas for Medical Sciences (1992); Pathology Residency: University of Kentucky, Lexington (2000); Cytopathology Fellowship: University of Wisconsin Hospital and Clinics, Madison (2001); Biomedical Informatics Fellowship: University of Pittsburgh (2002).

Applications:

Send cover letter with application (download from website) personal statement, CV and three letters of recommendation to: Jimmie Stewart III, MD, Associate Director Cytopathology, University Hospital and Clinics, Cytology/Clinical Labs E5/488 CSC, 600 Highland Avenue, Madison, WI 53792-2472.

Phone: (608) 265-5264 **Fax:** (608) 263-6453 **E-mail:** jstewartIII@uwhealth.org
