## Conference Overview

This four-day extensive review of multiple systems in anatomic pathology will allow anatomic pathologists to become more proficient in different fields of pathology. The didactic presentations from leading national experts in the field of pathology will provide in-depth discussions of problems in diagnoses that practicing pathologists face in their hospital day-to-day activities while the seminar will help residents and fellows with their specialty boards

## Intended Audience and Conference Objectives

This seminar is intended primarily for practicing pathologists, fellows, residents and other health care professionals.

At the conclusion of this seminar, participants should be able to:

- demonstrate improvement in diagnostic skills in problematic areas of anatomical pathology
- identify, classify and differentiate benign, premalignant and malignant lesions in different organs
- apply special immunostains and molecular testing in the evaluation of non-neoplastic and neoplastic diseases
- communicate results effectively with the clinician and better appreciate the importance of clinicopathologic correlation
