Course Description
This 2-day program will consist of lectures, case presentations and discussions designed to provide pathologists with a special interest in cytopathology, pathologists-in-training and cyto-technologists with an in-depth discussion of current criteria and changing concepts in Diagnostic Cytopathology.

Statement of Need
Diagnostic cytopathology performs a vital role in the evaluation and treatment of patients with non-neoplastic and neoplastic disease. This course is needed to advance the specialized knowledge of practicing cytologists and further, to encourage the exploration of current approaches and concepts in classification, differential diagnosis and management. It is designed to provide updated practical, problem-solving knowledge and information for cytopathologists, pathologists, residents and cytotechnologists.

Course Goals and Objectives
It is intended that this Weill Cornell CME activity will lead to improved patient care. At the conclusion of this activity, participants should be able to:

- Identify cytologic criteria of various non-neoplastic and neoplastic entities
 - Avoid problems and pitfalls
 - Recognize utility of ancillary techniques
 - Become familiar with unique management schemes in gynecologic and non-gynecologic cytology
- Target Audience**
Cytopathologists; pathologists; residents; cytotechnologists.
- Location**
