

Molecular Pathology Symposium

Gold Coast, Australia

10 and 11 September 2016

Course Description

Griffith University Health Group and the internationally renowned MD Anderson Cancer Centre (Texas) are collaborating for the first time to present the 2016 Gold Coast - Molecular Pathology Symposium. The symposium is part of the annual function of Menzies Health Institute Queensland.

Pathologists in training and pathologists interested in international accreditation will also have the opportunity to attend a special seminar on the role of molecular biology in pathology practice. The seminar will also help established professionals extend their clinical pathology skills, based on the latest research.

Target Audience

Open to pathologists, pathology registrars, researchers and students, this is an invaluable opportunity to interact with some of the best minds in the application of molecular biology in anatomical pathology.
